# CONTENTS

	Page
1. Avduyevskiy, V.S., Polezhayev, V.I. Certain common principles governing principles of hydrodynamics, heat- and mass-exchange upon change in a mass force field.....	<u>176</u> 3
2. Golovin, B.I., Zinov'yev, V.S., Iz'yurov, A.V., Komarov, N.V., Kurbatov, L.N., Kholina, Ye.N., Barmin, I.V. Preliminary results of experiments on crystallization of solid solutions of CdTe-HgTe under conditions of weightlessness.....	4
3. Tatarchenko, V.A. Features of crystallization given capillary forming under conditions of weightlessness.....	4
1.1 Khryapov, V.T., Tatarinov, V.A., Kul'chitskaya, T.V., Kul'chitskiy, N.A., Markov Ye.V., Krupyshev, R.S. Cultivation of volumetric monocrystals of germanium by the method of directed crystallization under conditions of microgravity.....	7
1.2 Abramov, O.V., Zver'kov, S.A., Kazakov, I.P., Rakhmatov, O.I., Chashechkina, Zh.Yu. Investigation of crystals of RbTe obtained by Bridgeman's method on a "Kristall" device under the conditions of the "Salyut-6" orbital station.....	8
1.3 Verezub, N.A., Kopeliovich, E.S., Nazarova, L.V., Rakov, V.V. Features of crystallization of certain semiconductor materials under conditions of microacceleration.....	10
1.4 Grishin, S.D., Obydennikov, S.S., Savichev, V.V. Measurement of inertia force and acceleration aboard an orbital station.....	22

	Page	
1.5	Anisimov, N.Yu., Leskov, L.V. On the distribution of impurities in crystals cultivated under conditions of weightlessness.....	12
	Anisimov, N.Yu., Leskov, L.V. On the dynamic stability of a melt in a cylindrical ampule under conditions of weightlessness.....	13
S1.1	Cherepanova, T.A., Ilyukhin, V.V. Questions of the mechanism and kinetics of processes of crystallization given low gravity.....	15
S1.2	Kazakov, I.P. Cultivation of PbTe monocrystals by the method of zone melting with a solvent.....	16
S1.3	Barmin, I.V., Zemskov, V.S., Senchekov, A.S., Raukhman, M.R., Pchelintsev, S.M. Thermocapillary convection near a front of crystallization during cultivation of InSb crystals under conditions of weightlessness.....	16
S1.4	Dolgikh, G.A., Feonychev, A.I. Numerical investigation of the distribution of impurities during guided crystallization of a melt in cylindrical ampules with different dimensions of the wetting surface.....	17
S1.5	Nikitin, S.A., Fedyushkin, A.I. On the causes of macrosegregation of an impurity during technological experiments on guided crystallization under conditions of weightlessness.....	19
S1.6	Khryapov, V.T., Ruzhkov, S.I., Kul'chitskiy, N.A., Biryukov, V.M., Markov, Ye.V. Investigation of chemical gas-transport of germanium in the system Ge - GeI <sub>4</sub> under conditions of microgravity.....	20

S1.7	Alad'yev, S.I. Speed of growth of crystals from the vapor phase under conditions close to those of weightlessness.....	22
S1.8	Kirko, I.M., Iodko, E.A. On the design of an experiment on the mechanism and kinetics of producing titanium by a metal-thermal method.....	24
S1.9	Lebedev, A.P., Polezhayev, V.I. Calculating the micro-acceleration aboard an AES /artificial earth satellite/ in a regime of gravitational stabilization.....	25
2.1	Gershuni, G.Z., Zhukovitskiy, Ye.M., Yurkov, Yu.S. Vibration thermal convection in a sealed area under conditions of weightlessness.....	27
2.2	Bologa, M.K., Kozhukhar', I.A., Mardarskiy, O.I., Kozhevnikov, I.V. Electroconvective heat exchange.....	28
2.3	Kopbosynov, B.K., Kuznetsov, V.V., Pukhnachev, V.V. Qualitative questions of the theory of thermocapillary motion....	29
2.4	Berdnikov, V.S., Zabrodin, A.G., Markov, V.A., Panchenko, V.I. Thermal gravitational-capillary convection in a rectangular cavity.....	31
2.5	Myznikova, B.I., Tarunin, Ye.L. Numerical modeling of the processes of crystallization with convection.....	31
2.6	Polezhayev, V.I., Prostomolotov, A.I. Gravitational and nongravitational mechanisms of mixing a melt in Chokhralskiy's method.....	32
2.7	Lyumkis, Ye.D., Martuzan, B.Ya., Martuzane, E.N. Interaction of fluxes evoked by thermocapillary convection and rotation during zone melting and their influence on the distribution of an impurity.....	32

/178

2.8	Distanov, V.E., Nenashev, B.G. Optimization of the conditions of growth of monocrystals taking into consideration the hydrodynamics of the melt.....	33
S2.1	Gershuni, G.Z., Zhukovitskiy, Ye.M., Chernatynskiy, V.I., Sharifulin, A.N. Nonstationary heat exchange in a cylindrical cavity in the presence of vibration kinetics.....	34
S2.2	Gershuni, G.Z., Zhukovitskiy, Ye.M., Ponomarchuk, A.I., Shikhov, V.M. Stability of flat parallel vibration-convection current.....	35
S2.3	Yurkov, Yu.S. Vibration thermal convection in a square cavity under conditions of weightlessness given random frequencies.....	36
S2.4	Marifulin, A.N. Vibration convection in a cylindrical layer under conditions of weightlessness.....	37
S2.5	Sharifulin, A.N. Stability of convective motion in a flat layer in a vibration field.....	36
S2.6	Zen'kovskaya, S.M. Vibration convection in weightlessness..	40
S2.7	Gertsenshteyn, S.Ya., Rakhmanov, A.I., Rodichev, Ye.B., Semin, V.N., Shmidt, V.M. Convection in a rotating layer of fluid.....	41
S2.8	Zorin, S.V., Putin, G.F. Experimental modeling of convection under conditions of weightlessness.....	42
S2.9	Pshenichnikov, A.F., Tokmenina, G.A. On the deformation of a free surface of liquid by thermocapillary motion.....	42

S2.10 Briskman, V.A., Zuyev, A.L. Ground modeling of thermo- capillary drift of bubbles under conditions of weightless- ness.....	45
S2.11 Kazenin, D.A., Mankevich, V.N. Drift of a bubble in a non-uniform field of volume-soluble SAS.....	46
S1.12 Sklovskiy, Yu.B. Influence of thermocapillary convection on heat emission in slots.....	48
S1.13 Nepomnyashchiy, A.A., Simanovskiy, I.B. Numerical investiga- tion of thermocapillary convection under conditions of weightlessness.....	50
S2.14 Dubovik, K.G. Parametric investigation of thermocapillary convection.....	51
S2.15 Shalimov, V.P. Certain analytical solutions to the problem of Maragoni convection in a flat layer of melt with two free boundaries in weightlessness.....	52
S2.16 Andreyev, V.K. On the stability of the interrupted motion of a band of viscous liquid with consideration of thermo- capillary forces.....	52
S2.17 Zhakin, A.I. On calculation of electroconvective currents..	53
S2.18 Saranin, V.A. Convection caused by thermoelectromotive force under conditions of microgravity.....	55
S2.19 Belyayev, Yu.N., Yavorskaya, I.M. On the possibility of modeling central-symmetrical convection under conditions of weightlessness.....	56

S2.20	Usenko, V.P., Vaysleyb, A.V. Electroconvective instability of an isothermal layer of liquid dielectric.....	58
S2.21	Blum, E.Ya., Chukhrov, A.Yu. Numerical investigation of thermomagnetic convection on a horizontal cylinder.....	59
S2.22	Bibik, Ye.Ye., Shumilov, V.M. Influence of a rotating field on temperature and uniformity of a suspension.....	62
S2.23	Bibik, Ye.Ye. Features of the state of ferrosuspensions in a variable field.....	63
S2.24	Myznikova B.I., Tarunin, Ye.L. Features of numerical solution of Stefan's problem with convection in the variables of current and rate vortex.....	63
S2.25	Starshinova, I.V., Smirnov, V.A., Fryazinov, I.V. Analysis of the process of heat- and mass-transfer in a melt of germanium during cultivation of monocrystals according to Chokral'skiy's method.....	66
S2.26	Bogatyrev, A.F. Thermodiffusion in gases as the cause of arisal of thermoconcentration convection.....	67
S2.27	Pinyagin, A.Yu., Pshenichnikov, A.F., Shaydurov, G.E. Experimental investiation of thermocconcentration convection at low Rayleigh numbers.....	69
S2.28	Dolgikh, G.A., Feyonychev, A.I., Frolov, A.M. Numerical investigation of the process of mixing two gaseous media feeding one gas and removing the mixture from a cylindrical container.....	70

- S2.29 Kosov, N.D. Coefficients of diffusion and equations of hydrodynamics of a non-equilibrium gaseous mixture in different systems of counting.....72
- S2.30 Avgustinovich, I.G., Vozovcy, L.P., Yakushin, V.I. Spread of light rays in a binary mixture under conditions of weak thermoconcentration convection.....75
- S2.31 Yastrevob, G.V. Features of convective motion in large centrifugal fields.....76
- S2.32 Kapinos, V.M., Pustovalov, V.N., Rud'ko, A.P., Matveyev, Yu.Ya. Investigation of thermal convection in a cylinder rotating around its axis.....77
- S2.33 Chernatynskiy, V.I. Numerical investigation of centrifugal convection in a cylindrical layer..... 79
- S2.34 Sinitsyn, A.K., Fertman, V.Ye. Thermal convection in a force field of variable intensity.....80
- S2.35 Grigin, A.P., Il'yin, B.I., Pet'kin, N.V. Convective diffusion in a rotating spherical layer.....82
- S2.36 Kuptsova, V.S. Numerical-analytical methods of resolving problems of heat- and mass-transfer with natural convection under conditions of low gravity.....83
- S2.37 Kuptsova, V.S., Korol'kov, A.V., Batarin, A.I., Malinin, V.G. Numerical and experimental investigation of conjugate heat exchange for a horizontal cylinder in a weak mass force field.....85
- S2.38 Borodina, N.N., Voyevodin, A.F., Leont'yev, N.A. Numerical methods of calculating convective currents in closed areas with low gravity.....86

S2.39	Mazurov, V.A., Myznikova, B.I., Tarunin, Ye.L., Fedorov, B.N., Chertkova, Ye.A. Conjugate problem of convection in a closed cavity surrounded by a heat conductive shell.....	88	
S2.40	Lyubimova, T.P. On convective motions of non-Newtonian fluid under conditions of low gravity.....	89	<u>/182</u>
S2.41	Glukhov, A.F., Putin, G.F. On mechanical equilibrium of nonuniform heated real liquid under conditions of low gravity.....	91	
3.1	Barmin, I.V., Senchenkov, A.S. Solution of capillary equation of Laplas for a two-bond axial symmetrical surface by the method of linearization and its application to the problem of crystallization under conditions of microgravity.....	93
